

28/03/08

This is a written statement from concerns brought forward by Mike Alsterlund in the last two meetings.

I still suffer the impression that we as concerned citizens participating in P.A.C. Meetings are intentionally guided into the direction of doing the company's business and giving the stamp of approval. This is a nice way of saying we are mushrooms.

Secondly I would like to state that these comments will not further me economically or any other way. My comments come from local input and a study of the historical evolution of the forest industry.

Over a year ago I, as a back woods oaky, recognized the fact that the forest industry was going into hard times, and inquired as to whether they had considered a harvest slow-down to accommodate the future gloom on the horizon.

**PORTION REMOVED FROM LETTER  
AS AGREED AT THE APRIL 1, 2008  
PAC MEETING.**

---

I fear at this point:

- 1) That the Alberta government will give away Albertans' trees again.
