

Economic Indicators
 Current SFM Plan and DFMP
 FMA0200040
 Tolko Industries Ltd., and Footner Forest Products Ltd.

Commitment	Indicator	Target
24	Volume (m3) harvesting during the 5-year cut control period	Harvest the approved AAC (+/-10%) over the 5-year cut control period
28	The number (reported as %) of business and employment opportunities given to local employers and/or citizens	The target is to have >80% of the contracts administered by the companies on the DFA completed by local businesses
29	The number of Business and Wood Supply Agreements (WSA) with local tenure holders and processing facilities	100% adherence to contractual obligations and agreements
Research	Commitment by the companies to adaptive management and continual improvement, investment and contributions to research is pursued where it can assist our operations.	
Contributions	The companies monitor financial and other contributions to local and other organizations.	
13	Annual harvest (%) from areas identified as being infested by spruce budworm or other insects and disease.	A minimum of 15% of the coniferous volume harvested during the first 5 year period will come from areas infested by spruce budworm.
14	Productive landbase that is harvested and reforested following natural disturbance.	>50% of the salvageable area will be harvested and reforested over a 5 year period.

Partially Economic Indicators: focus operations to derive currently available volume and avoid Sequenced area.

Others to possibly consider for 2009 DFMP:

- Employment from forest based communities in area during harvest operations: High Level, LaCrete, Fort Vermilion, Rocky Lane
- Aboriginal Employment – job fairs within communities, employment at mill or through contractor base.
